## Premium Sportsturf Fertiliser

The improved formulation of 2SPEC Endurance is the ideal formulation for when turf requires a balance between growth and durability. The equal potassium to nitrogen ratio builds strength in the plant to cope with the stresses of wear, seasonal demands, and disease pressures at the same time providing an even, resilient growth pattern. 2SPEC Endurance is ideal for managing N to K inputs throughout the growing season, in particular prior to the onset of dormancy to provide a sustained supply of N and K throughout the winter period.
