

AmendMAX

X-CHANGE 150-OM

Premium Soil Conditioner

AmendMAX X-Change 150-OM is a Premium Soil Conditioner that is ideal for amending and improving CEC and organic matter levels in sand based growing mediums. The AmendMAX X-Change 150-OM maximises the retention and availability of all nutrients (fertilisers), due to its high exchange capacity and organic matter content.

As a result the response from applied chemical fertilisers is extended, minimising losses via leachate and enhancing plant growth characteristics. AmendMAX X-Change 150-OM is ideal for use in most amenity horticulture growing situations including turf, landscape and ornamental garden beds, potting media and for amendment of topdressing sands.
