# POISON KEEP OUT OF REACH OF CHILDREN READ SAFETY DIRECTIONS BEFORE OPENING OR USING

A NEUTRALISING AGENT FOR USE ON TURF AREAS
WHEN ALKALINE CONDITIONS DUE TO EXCESS GALGIUM
AND MAGNESIUM SALTS PREVAIL.
CONTAINS 380 g/L PHOSPHORIC ACID.

# ANALYSIS:

24 g/L Nitrogen (N) as Ammonium 300 g/L Phosphorus (P) as Water Soluble

# **NET CONTENTS 10 LITRES**

Batch Number:

Date of Manufacture:

### DIRECTIONS FOR USE:

ANTI ALK should be used regularly in areas supplied with artesian or sub-artesian waters and in areas that have high soil pH. For best results the areas to be treated should be opened by coring, drilling or scarification. ANTI ALK should be applied in sufficient water to allow complete penetration to the root zone.

## **APPLICATION RATES:**

Initially apply 700 mL in at least 140 litres of water per 100m<sup>2</sup> (10 litres in 2000 litres of water per bowling green). This rate will reduce the soil pH by approximately one pH unit. Follow up applications on a fortnightly basis at 150mL - 350mL per 100m<sup>2</sup> (2 to 5 litres per bowling green) should then be applied until the desired pH is achieved. Repeat applications should be made as necessary.

# **SAFETY DIRECTIONS:**

Avoid contact with eyes and skin.

### FIRST AID:

If poisoning occurs contact a doctor or Poisons Information Centre. Phone 13 11 26. If swallowed do NOT induce vomiting. Give a glass of water. If skin contact occurs remove contaminated clothing and wash skin thoroughly. If in eyes, hold eyelids open, flood with water for at least 15 minutes and see a doctor.

NOTICE: This product is designed only for the particular purposes indicated on this label. Failure to use the product strictly as directed may be illegal, prove dangerous and render the product ineffective.
