RESISTANT WEEDS WARNING:

GROUP K HERBICIDE

Barmac DSMA Clear Selective Herbicide is a member of the Organoarsenic group of herbicides. For weed resistance management Barmac DSMA Clear Selective Herbicide is a group K herbicide. Some naturally occurring weed biotypes resistant to Barmac DSMA Clear Selective Herbicide and other group K herbicides may exist through normal genetic variability in any weed population. The resistant individuals can eventually dominate the weed population if these herbicides are used repeatedly. These resistant weeds will not be controlled by Barmac DSMA Clear Selective Herbicide or other group K herbicides. Since the occurrence of resistant weeds is difficult to detect prior to use, Barmac Industries Pty Ltd accepts no responsibility for any losses that may result from the failure of Barmac DSMA Clear Selective Herbicide to control resistant weeds.
