

Direction for Use:

Apply as a foliar spray application to turf. Dilute with water, using the application rate that delivers the desired level of response. When a greater response is required, use of the rate at the higher end of the application rate table is recommended. Apply in sufficient water to achieve adequate plant coverage with a calibrated sprayer. Tank mixable with Fertech Phosfighter and Fertech Kelpro. Avoid mowing for 24 hours following application.

Application Details:

Situation	Rate/100m ²	Rate/Ha	Water Volume	Comments
General turf growth promotion and repair in warmer conditions	200mL-400mL	20L-40L	Apply with 4-6L of water per 100m ² (400-600L of water per hectare)	Apply as a foliar spray when required. For best results apply at 2-4 week intervals depending on situation and how much growth is required
Winter green up and maintain maintain growth of slow growing and dormant warm season turf varieties in cold conditions	400mL-500mL	40L-50L		

Mixing:

Fill spray vessel with half the required volume of water. Add required amount of Fertech Fusion to the spray tank while agitating. Add remaining water to the spray tank. Continue agitating during application. Wash out spray tank, including nozzles, immediately after use.

Storage, handling & disposal:

Do not store below 5° C, as crystallisation may occur. Do not contaminate lakes, streams, dams or ponds by cleaning of equipment or disposing of waste into these areas. Avoid contact with eyes and skin by wearing appropriate protective equipment, such as gloves, boots, and safety goggles.

First aid:

In case of contact with eyes or skin, flush at once with large amounts of water. If irritation persists, seek medical attention. If swallowed, drink large amounts of water and induce vomiting. Seek medical attention.
