

# A bioactive all-purpose soil wetting agent

A unique all-purpose soil surfactant containing 5% kelp concentrate as Kelpro® to stimulate plant root growth. **Hydrolink Advance** is the ideal year-round wetting agent option for general turf and ornamental use to assist in penetration and retention of moisture, particularly in heavier soils or mulched surfaces. In addition to the concentrated kelp extract, Hydrolink Advance contains 45% blended surfactant, including a strong surface tension agent for rapid soil and mulch penetration, as well as a residual polymeric surfactant for ongoing performance following treatment. Designed, formulated and packed in Australia with Australian conditions in mind.

## Key Attributes of Hydrolink® Advance

-  High performance all-purpose surfactant
-  Added Kelpro® stimulates root growth
-  Ideal for use in turf and ornamentals
-  Contains penetrant and residual surfactants

Pack sizes:  
20L, 200L, 1000L

## Application details

Situation	Rate/100m <sup>2</sup>	Rate/Ha	Comments
To improve general soil moisture efficiency and plant health in all turf situations including greens, tees, fairways and sports fields.	200mL	20L	Apply in a minimum of 400L/Ha of water. Repeat applications as required. For best results irrigate following application with 4-6mm of water. Irrigate immediately following application when temperature exceeds 30°C.
On ornamental plants to reduce the impact of moisture stress at planting and throughout the growing season.	300mL/100m <sup>2</sup> or 3L/100L		Apply in a minimum of 1000L of water monthly or as required.
