

Premium non-ionic soil and thatch penetrating wetting agent

The surfactant blend with the highest surface tension acting properties in the Hydrolink range, Rapid is designed to re-wet and penetrate through hydrophobic or compacted soils and thatch layers. **Hydrolink Rapid** is formulated with two unique active ingredients; the first is a compact surface acting anionic surfactant designed to penetrate even the most hydrophobic soils, the second a heavier-weighted reverse block co-polymer for residual re-wetting performance. Designed, formulated and packed in Australia with the rigors of the tough Australian environment in mind.

Key Attributes of Hydrolink® Rapid

-  Unparalleled penetrative capabilities
-  Gets water into the root zone fast
-  Contains residual surfactant
-  Formulated in Australia

Pack sizes:
20L, 200L, 1000L

Application details

Situation	Rate/100m ²	Rate/Ha	Comments
Boom Spray	50mL	5L	For best results apply prior to periods of drought stress in a minimum of 400L/Ha of water.
Broadacre Injection	20 – 50mL	2 – 5L	Apply monthly or as required to ensure optimal efficiency is achieved during irrigation practices.
Positioning of soil-applied products	20 – 50mL	2 – 5L	To ensure proper placement of soil-applied products such as fertilisers, tank mix with Hydrolink Rapid and irrigate following application. Refer to Tank Mix Flexibility section before undertaking a tank mix.
