

A premium soil surfactant to treat and prevent localised dry spot

Hydrolink React rapidly overcomes the issues associated with dry patch both in the soil and within the plant. The concentrated L-Form Amino Acids provide the plant with the building blocks required to overcome heat stress related injury, and bounce back to health following a drought event. Hydrolink React is not just a curative product however, with residual performance working for 2-3 months to safe-guard your turf from localised dry spot, it is also ideal preventative treatment for problem hot spots. Designed, formulated and packed in Australia with the rigors of the tough Australian environment in mind.

Key Attributes of Hydrolink[®] React
