

Long term residual soil wetting agent

The benchmark in residual soil wetting agent technology, **Hydrolink Retain** works within the soil profile to retain moisture at the soil / root interface where the plant needs it most. Hydrolink Retain contains 100% of a unique alkoxyated polyether reverse block co-polymer, a new active ingredient for the Australian turf market providing optimum longevity and performance. Independent lab and field studies have demonstrated that Hydrolink Retain possesses exceptional moisture retention capabilities for up to 3 months. Designed, formulated and packed in Australia with local turf managers in mind.

Key Attributes of Hydrolink® Retain

-  100% surfactant formulation
-  Improves moisture retention
-  Residual for up to 3 months
-  Exceptional turf safety

Pack sizes:
20L, 200L, 1000L

Application details

Situation	Rate/100m ²	Rate/Ha	Comments
To enhance moisture retention and irrigation efficiency in broadacre situations.	250 - 500mL	25 - 50L	Apply in a minimum of 400L/Ha of water. Repeat applications as required. For best results irrigate following application with 4-6mm of water. Do not apply when temperature exceeds 30°C.
To improve the retention and distribution of moisture in fine cut turf surfaces such as golf and bowling greens.	250 - 400mL	25 - 40L
